## CallMe

Answer  
your video door  
phone from your  
smartphone

URMET IS IN YOUR LIFE

There's always somebody at home.

Ask "Who's there?" from your smartphone, even when you are not at home.

**CallMe** is the call forwarding system designed by Urmet allowing to use your smartphone or tablet to answer your video door phone and open doors and gates even when you are not at home. The connecting device

must be installed in the apartment and does not require any activity in the common areas: simply install it inside the video door phone system and download the free **Urmet CallMe App**.

It's inexpensive and very effective. When you least expect it. In the era of connected objects, just one thing was missing: the video door phone.

With CallMe you will no longer be forced to stay at home waiting for the courier or to hang notices at your front door, but you will be able to answer your video door phone and see who is looking for you at any time, as if you were at home. **Some examples?**

**+ COMFORT**

Are you in the garden, on the terrace or watching the TV? With **CallMe** you do not have to stand up to answer and you do not have to stop doing what you are doing.

**+ PRACTICALITY**

Is there a parcel for you and you are not at home? With **CallMe** you can speak with the courier and arrange a new delivery or open the door to leave the parcel to a neighbour.

**+ SECURITY**

Do you have elderly parents? **CallMe** allows you to control who rings the doorbell and answer in their place. Moreover, they can call you on your smartphone by simply pressing a key on the door phone.

**+ POSSIBILITIES**

Have you got a second house? With **CallMe** managing the calls is no longer a problem: you can check who rings the doorbell through your smartphone when you are away.

It works with your ADSL connection and your Urmet indoor station.

**Call Me** It is compatible with all Urmet 2Voice video door phones and door phones.

To enable the call forwarding function **you do not have to replace your video door phone**, but you simply need install an additional component. **CallMe** is compatible with all Urmet video door phone devices, **even audio**, of the 2Voice range. User can decide whether to install the device on the DIN panel or on the wall using the special kit. The device is extremely simple to install: to make it work simply connect it to the **ADSL** through **Wi-Fi** connection or **network cable**. Unlike other products on the market, **CallMe** features a **RJ45** port for **Ethernet** connection allowing to use the device also without **Wireless** connection or in case of poor **Wi-Fi** signal coverage.

## Why choose it?

COMPATIBLE WITH ALL 2VOICE INDOOR STATIONS AND 1722/81, 1722/83 AND 1722/85 KITS

THE OLD VIDEO DOOR PHONE DOES NOT HAVE TO BE REPLACED

IT ALLOWS FORWARDING THE CALL TO UP TO 4 MOBILE DEVICES

IT ALLOWS INTERCOM CALLS TOWARDS THE MOBILE DEVICE

IT ALSO FEATURES A RJ45 PORT FOR WIRED CONNECTION

IT DOES NOT REQUIRE POWER SUPPLY UP TO 12 INDOOR STATIONS

## Smart and safe with Android and iOS apps.

User can use his/her mobile to configure the call forwarding function based on his/her needs.

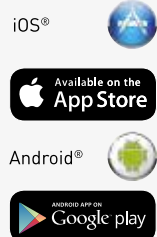

**SET** two time bands for the automatic switching off of the **Wi-Fi** and thus reduce the electromagnetic pollution.

**DEFINE** video signal quality based on the speed of your connection. It works also with low-quality signal networks (from 300 Kbps).

**SET** call reception only when you are **Wi-Fi** connected, thus saving your data traffic.

## A comprehensive commercial offer

For new and existing systems,

**CallMe** is the solution meeting all needs.

CallMe call forwarding device is **compatible with all 2Voice Urmnet devices and with 1722/81, 1722/83 and 1722/85 kits** and is also available in practical **all-in-one kit solutions** for apartments and independent houses. Contact your installer to learn more about it.
